

To whom it may concern,
I live in rural Colorado. There are 2 radia stations which serve the area. Both of them focus on farm reports and Country Music. For the past 40 years we have been limited on what we can listen to. I ask that you please reject the National Association of Broadcasters petition 04-160. We have been waiting for something like xm radio for a lifetime. This is a paid service that costs considerably over a years time. Radio stations and lobbyists should not have a say in what we can and can't listen to as long as it falls within the law. So once again with so many of our freedoms being compromised, let's not let this be one of them.

Thank you for your consideration,
Cary LaCost
Faithful XM listener
